INTRODUCTION

The MULTI12 is a multipurpose 12" two-way self-powered speaker with built-in DSP. The cabinet is made of robust engineering Polymers which results in a lower weight, and a high power. The MULTI12 has an improved sound quality due to its high quality European branded speaker components. You can use the MULTI12 as live PA speaker, for DJ sets, with or without sub, but also as a wedge monitor, DJ monitor and for sound reinforcement in pub's, clubs, small theaters, churches and many more. This highly versatile product can be used in many ways.

With a 12" low-frequency woofer and a 1" high-frequency compression driver with a titanium diaphragm, the MULTI12 is a 2-way full-range active speaker that can be deployed in multiple applications. Its characteristics include big dynamic, high sensitivity, clear MF and HF with a powerful LF.

The MULTI12 design takes care of combining the horn with the cabinet. Due to its rigging points and mounting holes, the rigging possibilities are endless. Pair your Bluetooth device by only pressing a button and play your favourite music in an instant. Connect your instrument or microphone by using a jack or XLR input on the back panel of the speaker. The 2-way XLR/TRS input mode ensures ease of use.

With the all-weather tote that also can be used as rain cover, no weather condition is too rough to fulfil the job that has to be done. The MULTI12 is an all-round 12 inch loudspeaker that stands its ground and will make sure you will get your job done.

DISCLAIMERS

AED Audio, AED DISTRIBUTION SA, with registered office at Bedrijvenpark De Veert 13/4, 2830 Willebroek (Belgium), or any of its affiliates, does not accept any liability for material damage, including damage to the Product, or personal injury caused by non-observance by the user of the safety instructions in the Manual or the applicable laws. As such AED Audio shall among others not be liable for any damage or injury if the Product is used contrary to or for purposes other than its intended use, is installed, used, maintained or repaired negligently or contrary to the instructions mentioned in the Manual or on the Product, when the Product is modified and when the safety devices and features of the Product are disregarded or overridden.

INTENDED USE

This system is intended for use by trained personnel for professional applications. The Product is not intended to be used by minors. Any use, regardless whether or not under the supervision of an adult, is at own risk.

8	Balanced mono output	XLR

TRANSPORTATION, HANDLING AND COMMISSIONING

TRANSPORTATION

Keep the product dry and the temperature between 0°C and 30°C to avoid damage to the speaker. Please always handle with care.

REMOVE THE SHIPPING ASSEMBLY

Before unpacking the fixture, please make sure that the packaging is in good condition and that following items will be found in the box:

- 1x MULTI12
- 1x Safety instructions

Remove the tape from the box and open the box. Take the unit out and remove the plastic foil around the unit. Make a visual inspection of the unit. Please check condition of units while unpacking, if any damages occur, the unit must be repaired/replaced before it can be used. Please contact your local distributor for service. If units are damaged and still used, AED Audio cannot be held liable for any risk/danger or occurrence given by these damaged units.

INSTALLATION

There are specific regulations like BGV C1 (old VBG 70) or country related regulations which need to attend during the installation. The installation has to be handled by skilled persons only!

Suspension device has to be built and calculated in order to handle up to 10 times its specific load limit over a time of one hour without permanent or harmful deformation.

Installation has to be done with a separate, independent suspension device like a safety chain.

Trespassing the danger zone below the installation during the assembling is prohibited.

Installer has to take care of all safety and machinery installations are approved by authorized persons before first operation or after changes before restarting.

Installer has to take care of all safety and machinery installations are approved by skilled persons at least once a year.

Installer has to take care of all safety and machinery installations are approved by authorized persons every four years during the acceptance inspection. Spotlight should ideally installed outside peoples lounge area.

ATTENTION

Installation overhead needs a high level of experience. This includes (but is not just limited to) calculation and definition of load capacity, used installation material and regular safety inspections of used material and the fixture itself.

Never try to do the installation by yourself if you are not qualified, instead you have to instruct a skilled installer.

Inappropriate installations can cause injuries and/or damage of property.

CAUTION: Mounting place must be sufficient stable and be able to support a weight of 10 times of the unit's weight.

CAUTION: Assure the specified safety distances to flammable material.

MAINTENANCE

Operation only allowed to qualified person, damages due to unprofessional operation or remove of any parts inside will not be considered in warranty service. There are no serviceable parts inside the device or package, service only leaves to authorized dealers.
